**“An answer
for every woman”**

Bioline Jatò experts
learn targeted
treatments to meet the
needs of all skin types
and provide tangible
results that are
increasingly advanced

We imagine the future of cosmetics every day

EXPERT HANDS RELEASE THE POTENTIAL OF THE PRODUCTS, ENHANCING THE QUALITY OF THE EXCLUSIVE FORMULATIONS THAT COMBINE NATURAL ACTIVE INGREDIENTS WITH HIGHLY-ADVANCED COSMETIC BIOTECHNOLOGIES TO GET IMMEDIATE AND LONG-LASTING BEAUTY AND WELLBEING RESULTS.

Scientific research and training, products and manual techniques, precision and sensitivity are the cornerstones on which Boline Jatò built its regime and its success. The customer approach involves a skin diagnostic system and includes a salon treatment plan supported by the Boline Jatò®System method and an at-home maintenance phase. It meets the specific needs of every skin type with Beauty Projects that can be personalized depending on age and seasonal biorhythms and based on alternating and diversifying the products and treatments. That is why the Boline Jatò range supports a wide variety of professional treatments, combined with an abundant collection of effective products for at-home maintenance and self-care: to meet the specific needs of every man and woman, any place and any time, be it in the salon or at home.

The constant pursuit of quality that distinguishes the cosmetic lines and personalized treatments of Boline Jatò comes from the passion of a family and the professionalism of an all-Italian production chain with long-standing reliability and experience. Natural active ingredients and latest generation technologies are used to serve beauty to create safe cosmetics that preserve the purity and aesthetic effectiveness of all their natural components. Before it is launched, every new product undergoes a double internal test: sensory tolerability and pleasantness first and functional effectiveness second. Having passed this first control, the product is then tested by national third-party bodies that are certified at the highest level. Cutting-edge laboratories and modern structures represent the heart of manufacturing, guaranteeing safety, reliability and production quality.
